22 Here followeth the dispositi-
on of the wether from New yeares daye
to the. xi. of Marche, and of the syck-
nesses therof.

January shalbe first
dry and excedinge
cold frostes, and af-
ter the last quarter
of the mone, the we-
ther shal be colde
& moist, wyth some

snowe, and sometimes frost. Aboute the
chaunge of the mone we shall haue cold
moisture, after shalbe windy and cloudy.
And about the full moone colde and dry
wether. In the end of this monthe colde
frost, sometimes cloudy, raine, or Snowe.
February shalbe cloudy and windy, cold
and moist, and oft times inclined to rain
or snow, and some great winde.

Marche in the beginning shalbe windy,
but faire and temperate, and some dayes
cold, some daies a little raine.

I do consider the generall influence and

dyphneā, inflammation of the lungs boher:
in mediastin⁹ & dyaphragma vexabūtur,
therfore infirmi patientur pungentē in la:
tere cum difficili respiratu, also much reus:
mes and distillations from the hed, wyth
coughing and stopping of the brest, Schy:
nanchy, swelling in the throte, falling sick:
nesses, palsy, could goutes, dropsey & swell:
ing of the bealy, also stranguria et nephre:
tis specialis illi qui mercu. v. veneriter aut
lune influxum cōtraxerunt pl⁹ afficiētur.

Of the spring time, and second selson

of this yere, from the xi. of marche, vntyll
the xi. of June.

The beginning of the spring time shal
be moist, after faire and temperat, &
toward the end of March winde and
rain. Also April in the beginninge shalbe
moist & windye, after shalbe towarde the
new mone fair, and for the moste part af:
ter temperate and some daies rain. May
in the beginning faire and some what win:
dy, after shalbe vntedfast, some day faire,
some day muche raine.

A.iii.

June

A prognostication.

June in the beginning som rain, after the chaunge fair, some daies cloudy and windy, and toward the .ix. and .x. Day clout ye with a litle rain.

The springe time the seconde season of this yere 1564. beginninge when the sun entred the first Degre of Aries the .xi. The sicknesses that shall raigne in the
springe time, the seconde quarter of this
yere, Agues, Tertians, Agues contynue
caused of aboundaunce of hot bloude, as
Sinochos, fluxus sanguines per nares,
fluxus hemorrhoidalis, red face with pim
ples

A prognostication.

ples and apatytis of lepy, scabs, morphe,
goutes, with greate paine in the bones,
ioyntes and sinues, spitting of bloud with
pain in the side and the breast, poles and
impostumes, vomits colerick with great
pain of the stomake and the head.

Of the sommer, and third season

of this yere, enduryng from the xi. of June
vntill the xi. daye of September.

The rest of June shalbe excea-
ding hot and dry. Also Iulye
shalbe exceeding hot and dry,
nor no raine excepte it be by
thonder. August also shall be
hot and dry, except Venus existēs in libra
sua domo fuerit causa generalis cuiusdam
pluuie. And in like manner I found that
the beginning of September shall be fair
and temperate.

Sommer beginnes in the solstice esti-
ual, when the Sunne entreth the fyrste
degree of Cancer, the xi. daye of June,

of

A prognostication.

of this yere, also the coniunctions and the oppositions of the Sunne and the mone, and also of the Mone and Saturne, and of the Mone and Mars. I saye that we shall haue in thys sommer exceeding hotte sickneses, as sinochus putrida, sinechys, febris ardens proceeding of hot and cholericke bloude cum nece & periculo multo: rū nisi eos iuuerit presens remediū periti medici. many persons also shall haue great pain in the head, opthalmie, great inflammation in their eyes, in the face wyth swellinges, Also yong and cholericke persons shall fall in frensy wherein the brayne and the memory shall be troubled, ratione abundantis bilioli sanguinis in venis et arteriis cerebri et menyngis eius. Also Agues, pestilences with poises and postumes. In emūctoriis cerebrii cordis epatis, also much hotte and moiste vlcérations wythin the mouth, bomites and cholerickes, proceeding of the exceeding hot cholericke and burning agues.

¶ The

A Prognostication.

The alteration of the Wether

in the harvest time, and of the sicknesses thereof.

The beginninge of the harvest tyme
shalbe somewhat colde, after cloude
and windy, some daies great winde, some
daies much rain, and toward the ende of
September fair wether and temperate,
the beginning of October shalbe cold, af-
ter cloudy with winde and some rain, af-
ter vntedfast, sometimes faire, sometimes
winde, sometimes raine, and toward the
end shalbe cold and froste. Nouember in
the beginning shalbe winedy and moyst.
Aboute the full mone som rain and great
wynde, and towarde the end shalbe cold
froste, some dayes great wind and much
raine, the end cold raine and snowe. De-
cember in the beginning shalbe moist but
temperat, after cold frost and wind, some
daies snow, som daies cloudy with great
winde, about the full mone rain or snow,
after dry frost, som daies rain and snow, &
toward the end great wind, much raine or
snow, & the end fair and temperate.

The

A Prognostication.
